

# Process and Strategies Followed for the Preparation of the Country Reports on the Status of Aquatic Genetic Resources for Food and Agriculture

By Mr. Thay Somony, Director of Department of Aquaculture Development and **National AqGR Focal Point**, Fisheries Administration, Ministry of Agriculture, Forestry and Fisheries

At Ad Hoc Intergovernmental Technical Working Group on Aquaculture Genetic Resources for Food and Agriculture, Rome 20-22 June 2016

## Processes to inform and share the questionnaires:

- Short report on the result of the Asia Pacific Workshop **on the Status of Aquatic Genetic Resources for Food and Agriculture** in Bangkok, Thailand, 23-26 March 2015 and the questionnaires to be responded by the country to the Fisheries Administration and Ministry.
- Sharing the result of the Asia Pacific Workshop **on the Status of Aquatic Genetic Resources for Food and Agriculture** in Bangkok, Thailand, 23-26 March 2015 and the questionnaires to be responded by the country to monthly meeting with Fisheries Administration.

# Sources of Information and Data for Questionnaires

- Relevant Department of Fisheries Administration especially Department of Fisheries Conservation and Fisheries Affairs.
- Inland Fisheries Research Institute, Fisheries Administration
- Aquaculture Research Centers/Institute, Fisheries Administration
- Department of Aquaculture Development such as National Aquaculture Strategic Development Plan 2014-2030.
- Strategic Planning Framework for Fisheries 2015-2024.
- National Focal Point took responsibilities to complete the questionnaires.

# Next steps for implementation of AqGR in Cambodia

- Sharing to the Quarterly Meeting of the Technical Working Group on Fisheries and Sub-Group on Aquaculture of Fisheries Administration and Donor Partners.
- Planning and getting stocks of potential wild fish candidates (broodstock or juveniles) at our government aquaculture research centers/institute and commercial farms.
- Undertaking the genetic studies and analyses of the potential candidates for further breeding selections for aquaculture and stock enhancement.
- Considering the implementation of the Nagoya Protocol on the Access to Genetic Resources ...
