Interreg

**Interreg** is one of the key instruments of the European Union (EU) supporting **cooperation across borders** through project funding.

Its aim is to **jointly tackle common challenges and find shared solutions** in fields such as health, **environment**, research, education, transport, sustainable energy and more.

### Independent ageing with telemedicine

Elderly people in Cyprus are benefiting from telemedicine. A pilot project from Slovenia inspired Cypriot health providers to set up telecare services to enable their ageing population to preserve their independence and continue to live at home.

### Cutting CO<sub>2</sub> through better data sharing

The villages of Gernan (Gernan) in Rheinland-Pfalz will soon be able to take part in monitoring their local greenhouse gas emissions using widely accessible data portals, thereby helping to protect the climate. The portals were required by a project developed in Bavaria.

Two days peer review in Bulgaria on Structuring Centres of Excellence and Competence

“ *It is nice that we can use quick and efficient instrument [peer review] and get practical solutions to what one is looking for.*

*Selected peers were interested and provided advice relevant to the Bulgarian environment. It is very important because we can't accept any solutions - they have to be adapted to our regional/national context.* ”
