

## TreeCities4MED - Webinar 3

### *Integrated planning for a sustainable and resilient Turin*

Wednesday 30 June 2021, 14:00-15:30, Rome time

**Speaker:** Mr Simone Mangili, Aide to the Mayor, Sustainability Policy and Strategic Planning Mayor's Office, Municipality of Turin, Italy

**Description:** The City of Turin has recently adopted four major planning tools detailing strategies and actions for a sustainable and resilient future. The Strategic Green Infrastructure Plan lays out the strategies for the evolution, expansion and management of the city's green spaces. The Climate Resilience Plan examines the city's climate vulnerabilities and how the city will adapt to meet new challenges. The Sustainable Urban Forest Management Plan details the objectives and management practices to maximize the ecosystem services generated by the city's urban forest. Finally, the City has recently completed a comprehensive evaluation of nine ecosystem services produced by the city's green spaces and developed a tool kit for maximizing them and engaging private partners in the process.
