

Wood value chains as part of a sustainable transformation: central role of forest and farm producers and their organizations

Jeffrey Campbell, Manager, The Forest and Farm Facility

FOREST AND FARM FACILITY

Food and Agriculture
Organization of the
United Nations

Small but many is already big:

- The magnitude of small-scale forest product and wood production is grand but under-valued
- Building inclusive sustainable value chains can contribute to dramatically to further local economies, ensure climate resilient landscapes and implement the SDGs
- Focusing on this small and medium-scale sector means addressing inclusion and unique barriers
- Doing this seriously requires major transitions

Small but many is big: Vietnam

Forest to GDP <1%

25 million poor

people in forested areas

Forest cover

>40%

Forest accounts for **25 %**
total income

**3 million ha planted by
1.5 million households**

=

**2 ha/
HH**

Inclusive wood value chains support SDGs

Unique needs along the entire value chain
