

MAY 3, 2022 | 5:30 – 7:00 PM (KST) FOREST AND LANDSCAPE RESTORATION: IMPROVING OUTCOMES AND REMOVING BARRIERS

Over the last 20 years, forest and landscape restoration (FLR) has developed as an approach to increase the ecological integrity and functioning of degraded forests and landscapes while simultaneously improving human well-being and livelihoods. In this Decade on Ecosystem Restoration it is critical to have clear direction regarding the implementation and monitoring of FLR. Member organizations of the **Global Partnership on Forest and Landscape Restoration** will showcase successful FLR according to its [principles](#) and how they are engaging with actors across levels to build on the momentum of the Decade and create opportunities for scaling up and replication.

Time	Topic	Speaker
5:30-5:36	Opening remarks	Adriana Vidal (IUCN)
5:37-5:45	Utility of principles	Jim Hallett (SER)
5:46-5:54	FLR at scale	Anita Diederichsen (WWF)
5:55-6:03	Role of forest certification	Pina Gervasi (FSC)
6:04-6:12	Enabling factors	Christophe Besacier (FAO)
6:13-6:21	Diversity for restoration	Marius Ekue (Alliance Bioversity – CIAT)
6:22-6:30	Restoration of working landscapes	Nicolas Mansuy (CFS-NRC)
6:31-7:00	Panel discussion and Q&A	

WFC 2021
XV WORLD FORESTRY CONGRESS

THE GLOBAL
PARTNERSHIP
ON FOREST AND
LANDSCAPE
RESTORATION

Adriana Vidal
Chair of the GPFLR
Senior Forest Policy
Officer, Climate Change

Dr James Hallett
Vice-chair GPFLR, SER
Affiliate Professor at the
University of Montana

Anita Diederichsen
Landscape Restoration
Global Lead, WWF

Pina Gervasi
Climate and
Restoration Director,
FSC

Christophe Besacier
Coordinator of the FLR
Mechanism, FAO

Dr Marius Ekue
Africa Team Lead, Tree
Biodiversity for
Resilient Landscapes,
Alliance Bioversity -
CIAT

Dr Nicolas Mansuy
Forest Landscape
Researcher, Natural
Resources Canada's
Northern Forestry Centre
